FOOTWEAR TECHNOLOGIES

The human foot is unique and highly functional. Our goal is to create shoes that work with the foot, not against it. Understanding how the foot works during all movement phases of the sport of golf dictates how we build our footwear. adidas Golf performance technologies deliver out-of-the-box comfort, glove-like fit, rock solid stability and anchor-like traction. Our never-ending pursuit of innovative performance technologies is focused on the following key performance areas.

	STABILITY Stability is necessary for making a powerful, consistent and confident swing; you'll get it from adidas Golf's rock-solid foundation technologies.		THINTECH™ Low-profile outsole technology brings you even closer to the ground for improved stability, better overall footwork and ultimately more consistent ball-striking.
	GRIP adidas Golf advanced grip technologies deliver lock-down traction to keep your feet in place and promote balance, power and control.		TRAXION® A high-traction outsole technology featuring secondary lugs that are strategically shaped and placed to provide maximum grip and prevent slippage on all types of ground surfaces while remaining green-friendly.
			THINTECH™ cleat An advanced, cleat system that combines a low-profile, anti-clogging cleat design and thinner outsole receptacle to bring you lower to the course for better power transfer, more stability, better balance, improved overall footwork and more consistent ball-striking.
